## INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value in all asset classes and so is well placed to judge the relative merits of a wide range of investment opportunities.

## MARKET COMMENTARY

January was almost the mirror image of December and as a result Solutions started the year with a gain of +3.02%

The issues causing concern during the latter part of last year were either resolved or became less pressing. In particular it now seems that there is less upward pressure on US interest rates, talks continue about resolving the trade dispute between the US and China and the Chinese government is taking action to stimulate the domestic economy. In combination this was sufficient to encourage investors and equity markets responded accordingly.

During January all parts of the portfolio made a positive return with US equities, and in particular the technology sector, leading the way. Elsewhere, UK stock selection added value in a rising market, whilst the focus on highly rated bonds also delivered a good result. Gold, private equity and property also added value in the alternatives section.

The diversified structure of Solutions and the focus on both quality and liquidity has proved its worth during the recent period of volatility. A number of uncertainties remain, but reasonable economic growth and good company results are a firm foundation for investment this year.

## INVESTMENT THEMES

### Diageo

Diageo reported a very strong set of first year results in January with organic sales growing 7.5% and underlying eps 13% both comfortably ahead of market expectations. Diageo has an enviable position starting with market leadership in growing categories and regions. Consistent and growing profitability enables Diageo to pay a good and growing dividend. We believe that the present share price does not fully recognise these qualities.

## OBJECTIVE

The Nexus Global Solutions Portfolio is an actively managed, globally diversified, multi-asset class fund. The aim is growth over the medium term, with a dual focus on capital protection as well as capital appreciation. An understanding of macro economic conditions together with detailed research into individual securities is used to construct diversified, highly liquid portfolios, able to adapt to a unique range of market conditions.
