- The fund will primarily invest in a diversified portfolio of listed companies which have a minimum market capital of over £300 million at the point of investment.
- No restrictions in terms of investment type, geographical or economic sector.
- Forward foreign exchange contracts may be used to hedge currency exposure and minimise volatility in each investor share class. However, on giving 60 days' prior notice to Shareholders, the Fund may, in addition to its other investment powers commence using these contracts or derivatives for investment purposes.

The following **information** is also relevant:

- You can buy and sell your shares in the Fund on every Business Day.
- Shares are denominated in United States Dollars.
- Investment in the Fund should be regarded as long-term, which is upwards of 3 to 5 years.
- Due to the initial charges, if you redeem shares, particularly in the short-term, before an equivalent rise in the value of the shares is achieved you may receive less than the amount invested.
- All income from the Fund's investments will be re-invested and reflected in the value of the shares.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within less than 3 to 5 years.

Risk and Reward Profile

The above risk and reward indicator rates this Fund as category 4 meaning that the Fund offers a moderate risk of making a loss but also a moderate chance of making gains. It should be noted that even the lowest category on the indicator does not mean risk free.

The Fund's rating on this indicator is based on partially simulated data and therefore may not be a reliable indication of the risk profile of the Fund. Further, the rating shown is not guaranteed and may change over time.

The Fund's rating reflects the nature of its investments and the corresponding risks to which the Fund is exposed. These risk factors, which include the risks listed to the right, may affect the value of the Fund's investments or expose the Fund to losses:

Emerging Market Risks: Where the Fund invests in emerging markets, such investment may carry risks associated with failed or delayed settlement of market transactions and with the registration and custody of securities. There may also be lack of liquidity and increased volatility in the underlying securities.

Operational Risk: The Sub-Fund may be exposed to the risk of material losses resulting from human error or system failures or incorrect valuation or safekeeping of the underlying securities.

Currency Risks: The Fund may invest in other currencies. As a result, changes in the rates of exchange between currencies may cause the value of the shares to go up or down.

Charges and Expenses: Charges and expenses will be charged against capital, which may have the effect of constraining capital growth.

For more information regarding risks, please see the Risk Factors section in the Fund's Prospectus. The section entitled "Practical Information" below explains how you may obtain a free copy of the Prospectus and other useful information.
