

NEXUS GLOBAL DYNAMIC PORTFOLIO A (EURO)

A Sub Fund of Libero International SICAV plc

FACTSHEET - August 2021

INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value globally and is not constrained by benchmarks and so is well-placed to judge the relative merits of a wide range of investment opportunities. Irrespective of geographic locations, close attention is paid to individual companies in addition to understanding economic conditions. High conviction ideas are supported by a combination of quantitative analysis, in-house research and company visits.

MARKET COMMENTARY

July was a good month for financial markets and investors in the Nexus Global Solutions Portfolio which delivered a return of +0.91%, bringing the year to date gain to +8.91%.

The global economy continues to grow despite rising infection rates in many parts of the world and, in some places, new restrictions. The recovery from the pandemic induced recession last year is causing some growing pains with supplies not always keeping up with demand. As a result prices are rising, but most likely on a temporary rather than permanent basis. Central banks continue to support growth by keeping interest rates low for the foreseeable future.

Solutions is a diversified portfolio and last month all the major asset classes made a positive return. Supported by good results and optimistic statements, equities did best, with Alstria, which owns and manages office real estate in Germany, leading the way closely followed by Experian, Partners Group, Ares and Segro. The major US technology companies also performed well as they have for much of the last few years. Lagging somewhat were investments in Asia. Elsewhere fixed interest, particularly longer dated stocks, added value as did the hedge funds and infrastructure investments.

As we move in to the second half of the year the foundations are in place for further growth and the portfolio is well placed to benefit. Quality, liquidity and diversification have always been at the heart of our approach to investment and will remain so.

INVESTMENT THEMES

Lancashire Holdings Ltd

Lancashire provides global property insurance and reinsurance products. It focuses on short-tail, specialty property insurance and underwriting operations in Bermuda and London. The company's business lines involves in the area of underwriting which includes aviation, energy, marine, property insurance, property reinsurance and terrorism and political risk segments. In July Lancashire reported a strong set of H1 results with impressive premium growth supported by a positive pricing environment. Lancashire was purchased as a way of playing the hardening cycle in insurance pricing which was evident in July's release.
