

Nexus Global Solutions Port DBP USD

FACTSHEET - October 2025

LIBERO INTERNATIONAL (SICAV) PLC
NEXUS PORTFOLIO FUNDS

Strategy Objective

The Nexus Global Solutions Portfolio is an actively managed, globally diversified, multi-asset class fund. The aim is growth over the medium term, with a dual focus on capital protection as well as capital appreciation. An understanding of macro economic conditions together with detailed research into individual securities is used to construct diversified, highly liquid portfolios, able to adapt to a unique range of market conditions.

Investment Process

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value in all asset classes and so is well placed to judge the relative merits of a wide range of investment opportunities.

Market Commentary

October delivered another strong month for risk assets, with most global equity markets posting gains, led by the tech-heavy U.S. indices. Fixed income also performed well as investors largely ignored France's downgrade, focusing instead on expectations of further rate cuts by the U.S. Federal Reserve Bank and the Bank of England.

The overall environment remains favourable for risk assets, even as financial media highlight this time of year as seasonally weak, suggesting an imminent correction. The Federal Reserve cut rates by another 25 basis points and announced that they would end their balance sheet reduction (QT) on December 1st. Meanwhile, oil prices remain subdued around the \$60-65 per barrel level and energy prices in Europe are back to levels that prevailed before the Russian invasion of Ukraine. This represents a significant boost to businesses and households across Europe.
